

Retrained models: finalized future labels; training seasons 2022-23, 2023-24, 2024-25
 Artificial errors learned only from 2024-25; same 2025-26 Wednesday reports, source lags and absent-archive final proxies

Early two = 2022-23/2023-24; recent = 2024-25. C1: pathogen MLP, distance sharing, no covariates. C2: target MLP, no spatial sharing; inpatient, wastewater, Kinsa, ILINet, labs, FluSurv. C3: target MLP, neighbor sharing, Kinsa. US weight 20%; states/DC 80%; admissions weight twice ED. Fixed development contrasts, not prospective validation.
